

News from Y2

We had the best day ever at the Washington Wetland Centre! We began by exploring the woodland habitats to examine the wildlife that lived there. We went pond dipping and were amazed by the amount of different types of creatures we found swimming and crawling around! We used the key to name and describe them! Later, we met the otters, flamingos and went to bird watch in the hides. The whole day was spectacular!

We set sail with Captain Cook to discover Australia! We had to learn to name the world continents and oceans to help us correctly draw maps and plot Captain Cook's journey around the world. We studied Australian animals in science. We learned about their unique features and how they were adapted to live in the desert, a rainforest or in a coral reef. We made colourful artwork inspired by aboriginal paintings that tell fables and legends.

In writing, we read many fables from different cultures and learned how they have a moral that teaches us how to be a good person. We then wrote our very own fable! Your child will bring this fable home to share with you!

In maths, we did lots of pirate themed fun by measuring in centimetres, millilitres and grams! We used directional words to guide our crew mates through a dangerous maze to find treasure!

It has been an absolute pleasure to support your child's learning, go adventuring on trips and work together in our after school clubs. We wish everyone the very best as they move into year 3!
